

TFL Portal

More than just dots on a map.

Real-time GPS Tracking

Locate your vehicles, assets, and loved ones in real-time as they move across our mapping interface.

Alerts & Notifications

Receive real-time email notifications triggered by events you specifically want to monitor.

Custom Reports

Generate or receive scheduled custom reports via email like mileage or time clock information.

Driver Scorecards

Keep your drivers accountable for sensible driving by analyzing harsh braking, sudden acceleration, sharp turns, reckless driving, and speeding incidents.

Logistics & Route Optimization

Designed for small businesses, enter job addresses, auto generate routes, and assign jobs to your service employees with just a few mouse clicks.

Supply Chain Tracking

Know whether all the packages in your shipment arrived to its destination. If a package was misplaced, find out at what moment it was lost or possibly stolen.

Government and RFID Scanning

Scan any U.S. or Canada issued government ID or RFID ID tag and generate a passenger manifest for all those that board your GPS tracked vehicle

Surveillance Video On-demand

Request live video through our portal when using our TFL GPSTrackCam for up to 4 live camera feeds.

Sensor Monitoring

Whether your asset is moving or stationary: monitor temperature, humidity, open/close, battery levels, and so much more from a single dashboard.
